

Public Health Practice: Executive Public Health Practice Program/Master of Public Health MPH

The Executive Program in Public Health Practice (EPPHP) MPH program offers working professionals the opportunity to understand, assess, and manage population health in public health, health care, and human services settings. It brings together the art and science of public health.

Tailor the MPH to fit your practice and career goals with a combination of onsite and online public health courses. This high-tech and high-touch program supports your goals and lifestyle. The program requires a minimum of 42 credits.

PUBLIC HEALTH CORE REQUIREMENTS

16 credits

The basic curriculum courses are offered online and on-campus:

- PubH 6250** Foundations of Public Health (2 cr)
- PubH 6414** Biostatistical Literacy (3 cr and a 1 cr statistical programming course**) **or**
- PubH 6450** Biostatistics I (4 cr)

INTEGRATED LEARNING EXPERIENCE

PubH 7294 (1-4 credits)

** If PubH 6414 taken, a 1 credit statistical programming course needs to be taken as well. Consult with Program Coordinator about course options.

ELECTIVE COURSES

Students in the Executive Public Health Program (MPH) have the opportunity to choose their own graduate elective courses based on their career goals and interests.

The majority of Executive MPH students complete the elective courses at the Public Health Institute (PHI), which is offered in the last week in May and first weeks in June, during the May session.

PHI offers on-campus courses on a variety of current topics in a concentrated format over three weeks. PHI provides course content that emphasizes research to practice with opportunity for field trips, case studies and simulations. It provides a perfect setting to network with other professionals or explore a new area of interest in public health.

You may attend one to three weeks dependent upon your time and you can complete up to 7 credits at the PHI.

Other elective courses are offered online and on-campus during the fall and spring terms.
