

#### Did you Know?

Meningococcal disease is rare, but life threatening.
University students are at increased risk.
There is a vaccine to prevent it!

If you would like to help researchers learn more about the meningococcal B vaccine Trumenba®, join us for the

# **Trumenba Study among Students (TruSS)**

## Am I Eligible?

You may be eligible if you are a University of Minnesota undergraduate student aged 18-23 years old.

## Will I be compensated?

Yes! You can earn up to \$150 in Target gift cards.

#### What will I be asked to do?

Attend 2 in-person visits at the UMN, complete surveys, share your vaccination history, and give small samples of blood.

# How long is the study?

Participants will be in the study for 7 months.

This has been reviewed by the University of Minnesota Institutional Review Board (#00007174).

This study is led by Dr. Angela Ulrich at the UMN School of Public Health and funded by the US National Institutes of Health.
