Thank you for your interest in the F-EAT 2018 Survey. This survey was completed by the parents of young people ages 19-26 years in 2017-2018. The parents were enrolled in the study and completed a baseline survey in the academic year 2009-2010 when their children were attending middle school or high school. If you use items from this 8-year follow-up survey in your work, the following citations are recommended:

The psychometric properties of measures can be found in published manuscripts posted at the Project EAT website; however, only limited support is available for assistance with the survey.

More than 3700 parents and their adolescent children participated in this survey during the 2009-2010 school year and helped to increase national attention on what is needed to make healthy eating and being physically active easier for young people and their families.

We are now following up to learn more about how things are different for families as adolescent children become young adults - from the perspective of parents and their son/daughter who participated in Project EAT.

This follow-up F-EAT survey takes about 30 minutes to complete and we will mail you a $25 gift card as a “thank you” when we receive your completed survey. $25 in half an hour - - not bad!

If you have any questions about the survey, please contact us at feat@umn.edu, 612-626-3655 or 1-800-353-8636.

To get started, please answer these two questions:
