COMMUNITY HEALTH PROMOTION

Program Overview
This 2-year, full-time program requires a minimum of 48 credits, including electives chosen in consultation with the adviser. Part-time enrollment is also possible, and part-time students have up to five years to complete the degree. Most courses are offered on-campus during the day.

Students learn how to influence policy and public opinion on health issues, develop community-based programs to prevent disease, work on issues related to a specific population, and advocate for and evaluate efforts to promote healthy behaviors.

This program gives students the flexibility to tailor the curriculum to meet their individual needs and interests. Faculty focus on multiple public health issues including: obesity, tobacco/alcohol, infectious disease, LGBT health, global health, and public health policy.

The classroom experience is brought to life through a required applied practice experience. Students conduct professional-level research projects in local, state, national and international organizations.

Advantages of the Program
Connections. Partnerships with Twin Cities communities, health departments, nonprofit organizations and policy makers provide opportunities for collaboration and real-world experience.

Supportive environment. Students are supported through a cohort peer model, accessible faculty, and a network of more than 10,000 alumni who are dedicated to student success.

Comprehensive curriculum. Students are well-prepared with the skills needed to design, advocate for, and evaluate efforts to promote health behaviors and social conditions for populations.

Who Should Apply?
Students from any undergraduate background are encouraged to apply, including recent graduates, mid-career professionals wanting to increase mobility in their current position, or those looking to change careers completely. The emphasis on practitioner-based learning is a great fit for returned Peace Corps volunteers and AmeriCorp volunteers.

Preparing future public health leaders with the skills needed to create strong communities and a healthier world.
CAREER
Upon graduation, our students advance to local and international careers in a variety of settings, including all levels of government, community-based organizations, social service agencies, medical care organizations, workplaces, schools, and advocacy organizations. Graduates can also go on to pursue a PhD in social and behavioral epidemiology.

POSITIONS HELD BY GRADUATES
University of Minnesota
Health Promotion Specialist

Robert Wood Johnson Foundation
Communications Associate

University of California San Francisco Medical Center
Program Coordinator

City of Saint Paul
Government Relations Coordinator

BlueCross and BlueShield of Minnesota Foundation

Scholarship priority deadline: December 1
Final deadline: July 15

DUAL-DEGREE OPTIONS
MPH/JD
A partnership between the Community Health Promotion MPH program and the JD program at the University of Minnesota Law School.

MPH/MSW
A partnership between the Community Health Promotion MPH program and the MSW program at the University of Minnesota School of Social Work.

FACULTY PROFILE
Simon Rosser's research focuses on designing and testing “next generation” HIV prevention and interventions for high-risk populations, especially men who have sex with men and persons living with HIV. Rosser is involved in methodologic studies on how to conduct trials online. He is also principal investigator of the first NCI-funded study studying the effects of prostate cancer treatment in gay, bisexual, and other men who have sex with men.
