

## ENVIRONMENTAL HEALTH MINOR

The Environmental Health minor is designed for students who wish to understand how our physical and social environment affects public health. Students will learn about exposure to physical and social stressors, such as chemicals, infectious agents, stress, and violence; how stressors affect health; and how decisions are made to protect health. There are 6 required credits for Masters students and 12 for Doctoral students. Students will select electives in consultation with advisor and Director of Graduate Studies to complete the credit minimum. All minor coursework must be taken A – F. Graduate credits can be applied toward either the major or the minor/other requirement, but not both.
