EXECUTIVE PUBLIC HEALTH ADMINISTRATION & POLICY MPH

The Executive Public Health Administration & Policy (EPHAP) MPH program cohort model curriculum emphasizes the skills necessary for population-focused administration, policy development, and evidence-based public health practice. Students must complete a minimum of 42 credits. This is the proposed curriculum for Cohort 10. To complete program requirements, students will choose electives, in consultation with their academic advisor. Parts of the schedule are flexible.

All EPHAP MPH students complete their degree with a combination of online course work (31 cr), five on-campus sessions (7 cr), an Applied Practice Experience (AP; 2 cr), and a master’s project (Integrated Learning Experience; 2 cr) in an area of interest related to public health. Students are encouraged to choose projects in their communities or at their place of employment.
