

## GERONTOLOGY MINOR

As the population continues to age, the demand for graduates with knowledge of aging increases. The Gerontology Minor provides an opportunity to enrich graduate studies with an interdisciplinary program focused on aging. Students enroll in a multi-disciplinary foundation course and then select courses from core areas of psychosocial aging, geroscience/geriatrics, and policy. There are 8 credits for Masters students and 12 credits for Doctoral students. Doctoral students will select electives in consultation with Director of Graduate Studies. All required minor coursework must be taken A/F and achieve a grade of B- or above. Elective courses may be taken either A/F or S/N. Students must achieve a grade of B- or above for elective credits taken A/F. Graduate credits can be applied toward either the major or the minor/other requirement, but not both. Courses not on this list of electives may be considered upon petition and approval of the Director of Graduate Studies.
