PUBLIC HEALTH MINOR

The Public Health minor is designed to prepare professionals in health and other fields (e.g. law, business, architecture, urban planning, teaching and engineering) to understand how their professional activities impact the health of communities, and to work together across disciplines, organizations, and sectors on innovative strategies to improve population health. There are 8 required credits for Masters and Doctoral students; doctoral students will select electives in consultation with the advisor and the Director of Graduate Studies to complete the 14 credit minimum. All minor coursework must be taken A – F. Graduate credits can be applied toward either the major or the minor/other requirement, but not both.
